Audit and transfer pricing evidence checklist

Fictional examples for testing evidence retrieval and citations. Not legal advice, legislation, official guidance or verified professional standards.

1. AUDIT EVIDENCE CHECKLIST

For a fictional revenue review, inspect selected contracts, invoices, delivery records, credit notes and subsequent receipts. Reconcile the selected items to the ledger. Assess reliability and explain unresolved exceptions.

2. RELATED PARTY DOCUMENTATION

Obtain a fictional group structure, related-party transaction schedule, intercompany agreements, management explanations and transaction reconciliations. Identify missing records and inconsistent descriptions.

Audit and transfer pricing evidence checklist / continued

3. TRANSFER PRICING EVIDENCE CHECKLIST

Document the functions performed, assets used and risks described in the available records. Request support for the selection of a pricing approach and relevant comparisons. The checklist does not establish arm's length compliance or a statutory documentation threshold.

4. FICTIONAL SUPPORTING EXAMPLES

Fictional example: Demo Services has an intercompany management service agreement but no supporting activity schedule. The reviewer requests evidence of services, allocation workings and the basis for charges. No actual client data or legal conclusion is included.
