VAT review checklist

Fictional examples for testing evidence retrieval and citations. Not legal advice, legislation, official guidance or verified professional standards.

1. VAT RETURN REVIEW WORKFLOW

For a fictional VAT review, obtain the sales and purchase ledgers, invoice samples, credit notes and reconciliation workbook. Compare the proposed return totals to the underlying ledgers. Record unexplained differences.

2. INVOICE VALIDATION CHECKLIST

Check that invoice samples identify the supplier, customer, transaction description, invoice date, reference and relevant supporting amounts. Obtain missing support. This is a demonstration checklist, not a statement of mandatory UAE invoice requirements.

VAT review checklist / continued

3. INPUT AND OUTPUT RECONCILIATION

Reconcile sales ledger totals to output tax working papers and purchase ledger totals to input tax working papers. Investigate duplicate entries, unmatched credit notes and timing differences. Do not infer recovery entitlement from this checklist.

4. FICTIONAL TRANSACTION EXAMPLES

Fictional example: an invoice for AED 10,000 appears twice in a draft purchase reconciliation. The reviewer flags the duplicate and requests the original invoice and payment record. No statutory VAT rate or legal treatment is asserted.
